

## technology & imagination

### Advantages

**Full Range:** Go Mini // Go Mini Pro // Go Mini Evo.

**APS "Approaching System"**. When a button is pressed, the transmitter sends a flashing signal for 15 seconds so that the user can approach the door without having to press the button again.

**Duo-Technology** in the EVO model. GO Mini Evo works as a transmitter or a Proximity Element.

**Ergonomic design** for better transmitter control.

Ring support designed for **easy carrying** on key rings.

**Red led** to indicate operations.

**Frequency 868MHz**, 2 changing code channels, small and ergonomic design: 5.5x3cm. With APS Approaching System for maximum operating reliability and extremely easy to programme.

technology & imagination

#### Go Mini

- 868 MHz
- Nominal Range 100m
- 2 Channels
- Changing Code
- APS Approaching System

#### Go Mini Pro

- 868 MHz
- Nominal Range 100m
- 2 Channels
- Changing Code
- APS Approaching System
- Programmable
- Laser-marked series number

#### Go Mini Evo

- 868 MHz
- Nominal Scope 100m
- 2 Channels
- Changing Code
- APS Approaching System
- Programmable
- Laser-marked series number
- Duo-technology (868 MHz + 13.56 MHz) Transmitter + Proximity Reader
